

INFORMATION FOR MENTEES

WHAT IS MENTORING?

Mentoring is a professional relationship where one professional with more experience on a specific theme or topic (mentor) assists another professional (mentee) in developing a skill or provides advice or insights from their experiences to support the mentee's professional and personal development. The mentoring can be a once off conversation or a series of conversations, pre-determined and agreed by both the mentor and mentee. Alternatively, mentoring can take place via email following a once off conversation with the mentor. This is a flexible system designed to meet the needs and availability of both mentor and mentee.
